

CREATION/RESTORATION/ENHANCEMENT/PROTECTION

This form is to be used for projects which create, restore, enhance and/or protect wetlands. The form is divided into a section for creation, restoration and enhancement, which are lumped together, and a section for protection. Use additional forms for more than one habitat type.

CUPNO - is the permit number the mitigation occurs under.

MITIGATION TYPE - this is taken from the Mitigation Types For Database hand-out. See Support Services for the most up-to-date printing.

PARISH - name of the Parish where the mitigation project is located.

APPLICANTS NAME - name of the applicant.

MITIGATION FOR P# - fill in the "P" number for all impact projects being mitigated under this project.

ACRES CREATED/RESTORED/ENHANCED - this is the number of acres of each individual habitat type that is either being created, restored, and/or enhanced by the mitigation project.

ACRES PROTECTED - this is the number of acres of each individual habitat type that is being protected by the mitigation project.

HABITAT CODE - this is the habitat code for the wetlands being created, restored, enhanced, and/or protected.

AAHU - this number can be found on the WVA calculated by the mitigation analyst.

CHU - this number can be found on the WVA calculated by the mitigation analyst.
